- ✓ Copy and share courses from one LearningServer site to another
- ✓ Assign prerequisite courses
- ✓ Customizable course completion certificates
- ✓ Sell courses with eCommerce
- ✓ Collaborate with users via chats, discussions, and announcements

Extensibility as Needed

LearningServer uses a “Building Block” approach to extend the functionality of the base application. With four Collections and numerous individual add-ons, LearningServer implementations can be customized with the functionality that is needed. Collections serve to group similar functionality, such as content management tools (exam creation, course resources) and collaborative tools (chat, discussion).
