  - Podcast
- Exams
- Surveys

- ✓ Quickly create courses from existing documents and media files
- ✓ Create exams and associate them with courses
- ✓ Surveys provide collection and tracking of learner feedback
- ✓ Assignments
- ✓ Resources

### **Create and Enhance Course Content**

The Content Management Collection offers functionality that assists in the creation and extension of course content. The course Assembler provides instructors with a tool to quickly create a cohesive course out of individual documents/files such as html, pdf, and .wmv. Other features include course categories, assignments, and Exam/Survey creation and management.
